PROFILE

A dedicated and results-oriented Junior Full-Stack Developer with a strong focus on the Laravel ecosystem and modern JavaScript frameworks like React and Vue.js. Proven ability to build production-ready applications, including complex Point of Sale (POS) systems, from database architecture to responsive frontend interfaces.

WORK EXPERIENCE

Independent Software Developer

JAN 2024 - PRESENT

Remote / Project-based

- Engineered and deployed 3+ production-ready Point of Sale (POS) systems using Laravel and React/Vue stacks.
- Optimized database structures to ensure high-performance data handling and faster query execution times.
- Implemented modern UI/UX elements, including glassmorphism and animated infinite marquees.
- Managed the full software development lifecycle, from requirement analysis to deployment.

KEY PROJECTS

IMax POS System

Stack : Laravel, React, Inertia.js

Developed a high-performance Single Page Application (SPA) focusing on seamless UI transitions and reactive data management. Integrated secure role-based access control.

Pizza Ordering System

Stack : Laravel, React, Inertia.js

Created a full-stack ordering platform with a responsive design, focusing on backend CRUD operations and order processing.
